

# NON-STOP REWINDER - CLIPPER 4B

Compatible to all type of printing press. The non-stop rewinder **CLIPPER 4B** allows you to do in-line finishing at production speed and will consequently clear your finishing area. It can be used in-line with printing press or off-line with regular unwinder as a standalone equipment.

Compact and Integral solution, **CLIPPER 4B** allows you both rewinding direction (clockwise and anti-clockwise) as a standard. **CLIPPER 4B** automatically cuts and splices at production speed regarding roll diameter, number of labels or linear meter.

**CLIPPER 4B** is ideal for short runs and limited units per roll thanks to its cycle time of 17 seconds.

Designed, manufactured, tested in our facility, **CLIPPER 4B** non-stop rewinder is a unique solution on the market.

## CLIPPER

### 4 SPINDLES

Customization to your needs:

- Automatic ejection**
- Automatic core loading**
- Labels closing**
